

CORPORATE PROFILE

think project! – your partner for digital transformation

The global construction industry faces many challenges, such as pressure to deliver projects in time and on budget, as well as the increasing data volumes generated by an ever increasing number of parties involved on construction and engineering projects.

As a result, there is an emerging need for digital construction solutions such as think project! that facilitate cross-enterprise collaboration and overall information management.

think project! addresses today's digitalisation challenges in construction and engineering by providing state-of-the-art software solutions as well as industry expert consulting and services.

50 countries

10,000 projects

COMMON DATA ENVIRONMENT

The single version of truth for the project

For more than 15 years, think project! has delivered a readily available and shapeable Common Data Environment (CDE) for construction and engineering projects.

We support our customers in reducing time, costs and risks in project management by creating a Common Data Environment (CDE) for effective cross-enterprise project collaboration and by ensuring real-time availability and analysis of data across multiple touchpoints and devices.

The secure, ISO 27001:2013-certified CDE connects teams, processes, information and systems across company boundaries and supports the entire project lifecycle. think project!'s highly flexible solution portfolio is based on cutting-edge technology. Our offer also includes process management solutions for Building Information Modelling (BIM) and interfaces to general business applications such as ERP.

The CDE is available in 21 languages and is used by more than 150,000 users across 10,000 projects in 50 countries. Project sizes start at around one million euros and reach investment volumes of multiple billions.

DIGITALISATION

Today's key challenge for the construction industry

Megatrends like digitalisation and innovations such as the Internet of Things (IoT) and Building Information Modelling (BIM) represent great opportunities and major challenges at the same time. Stakeholders in construction and engineering need a strong partner on their side to face these challenges.

think project! addresses today's digitalisation challenges in construction and engineering by providing state-of-the-art software solutions as well as industry expert consulting and services.

We support this digital transformation with strategies and concepts for digital transition (digitisation), BIM implementation, strategic collaboration and information management.

Based on the experience gleaned from thousands of construction projects, we offer qualified consulting and services including strategic advice, identification of requirements, roll-out planning, software implementation, on-demand and ongoing support, maintenance and user training. Consulting and services are carried out by a highly experienced team of industry experts consisting of engineers, architects and solution specialists.

think project!

your partner for digital transformation

think project! was founded in the year 2000 in Munich, Germany. Since then, CEO Thomas Bachmaier has grown and developed think project! into the leading provider for cross-enterprise collaboration and information management in Europe. think project! also holds shares in companies offering complementary solutions and services.

Global customers from the construction and engineering industries are addressed from the home base in Munich and via a range of subsidiaries across Europe. From the R&D headquarters in Berlin, multi-national R&D teams responsible for software development and innovation are coordinated.

Our customers include

ACCIONA – AECOM URS – ASFINAG – Audi – Ayesa – Bayer – BMW – Budimex – Deutsche Bahn – Deutsche Lufthansa AG – Doosan – E.ON – Erbud – Ferrovial – Ghelamco – Griffin Real Estate – GS Inima – Hill International – HOCHTIEF – IKEA – Marriott Hotels & Resorts – Max Bögl – MHPSE – MTU Aero Engines – NATO – ÖBB – POLAQUA – PORR – Rhombert Gruppe – Royal BAM Group – SAAone (VolkerWessels, Boskalis, HOCHTIEF, DIF) – Sacyr – Samsung Engineering – SIGMA – SORAVIA Group – STRABAG – Swietelsky – TenneT – VAMED – Vattenfall – Züblin
